overview

make me dugouts have an in-house design service which means we can design a bespoke players shelter or canopy for your sports pitch or stadium. bespoke canopies can be used to create large players dugouts with cantilever and floor fixed designs available. we have supplied bespoke dugouts for a range of different situations including in-stand tiered dugouts, large 20 metre wide players dugouts and sports dugouts accommodating stepped areas.

in addition to the bespoke dugout framework we also work up various designs for seating, litter storage and storage benches within the dugouts to make the most of the available space. all our bespoke team shelters and dugouts can be customised using a range of vinyl covered cladding in either colour or frost finishes and applying corporate branded sponsorship logos, messages and panels. Bespoke dugouts standard specification includes:

- 5mm thick clear PetG cladding supplied as standard, thinner cladding available on request
- welded end caps for a high quality finish – no plastic bungs
- galvanised 50mm x 50mm SHS frame, larger sections available
- framework can be powder coated using standard or specific RAL colours
- large range of seating styles
- optional extras including club logo vinyl's and padded crossbars
- orders can be despatched flat packed with assembly instructions
- on-site installation service available with most orders subject to location

choose your finish

our entire dugout range uses 50mm x 50mm mild steel box section for the framework, we can however adapt to suit specific requirements. our main finishes for our dugouts are as follows; galvanised only, galvanised and powder coated or brushed stainless steel. all 3 finishes have their pros & cons and associated costs.

galvanised only

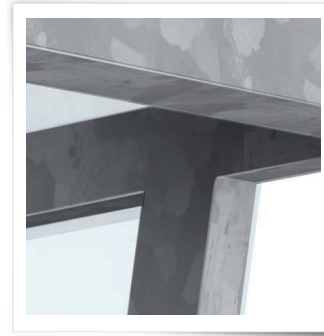

- increased corrosion protection – we prefer not to supply any dugout frame without this
- minimal maintenance required
- 10 year guarantee offered with this finish

powder coated and galvanised

- increased corrosion protection
- minimal maintenance required, easy clean finish
- 10 year guarantee offered with this finish
- large range of colours available, we can also colour match for additional cost

brushed stainless steel

- weather resistant finish
- high end finish
- rust resistant

galvanised

extremely durable finish with a corrosion resistant zinc coating to BSEN1461. High levels of impact resistance and abrasion with a 10 year corrosion warranty.

galvanised & powder coated

powder coating is applied in addition to the galvanised finish and is available in a variety of RAL colours to match your clubs colours in accordance to BS3900.

brushed stainless steel

high end weather resistant finish using 316-grade stainless steel.

choose your seating

our custom designed bespoke dugouts can incorporate many different styles of seats to accommodate various numbers of players and staff within the dugout according to the seat centres.

various seats we can supply have different designs and options through colour choice and personalisation. club or sponsor logos can be added to seat pads using both screen printing and embroidery; our 3D visuals will give a realistic indication of the layout and colours prior to manufacture to help get sponsors involved.

bench

12mm thick solid textured plastic bench available in various colours

moulded seats

cost effective seating solution available in a range of colours

BS premium tip-up

range of colours with various customisation options, club/sponsor logo options

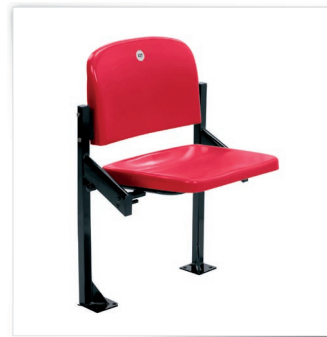

SS1 customised sports seat

high quality finish with multiple colour options and club/sponsor logo options

individual moulded bench

moulded plastic shells available in a variety of colours

SA tip-up

available in a range of colours to suit your club branding

SC padded tip-up

padded tip-up seat, with choice of colours and club/sponsor logo options

SS2 customised sports seat

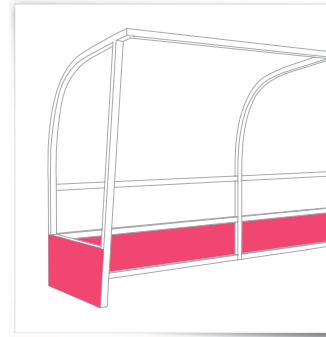

high quality finish with multiple colour options and club/sponsor logo options

choose your extras

we offer various extras to help customise your bespoke dugout and enhance your club band. add our sponsorship panel to display sponsors logos and messages or HOME and AWAY vinyl's, particularly useful when applying for funding.

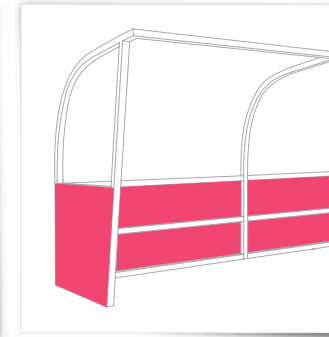

in addition we can supply full width advertising board structures as an add-on to large bespoke canopies or shelters to allow boards to slide in and out for an easy changeover, see our KIA oval players dugout for more details...

bespoke dugouts can have padded vinyl's fixed to the framework front crossbar and/or side uprights and are a great addition to any dugout, ideal for sponsor logos and thank you messages. padded football vinyl strips can be ordered at the same time as your football dugout order or at a later date.

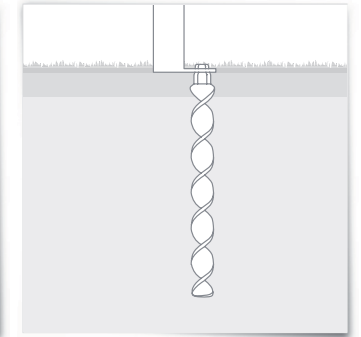

low level cladding

suitable for hockey dugouts for extra protection.

high level cladding

suitable for hockey dugouts for additional extra protection.

ground anchors

securely fixes the dugout to grass surfaces.

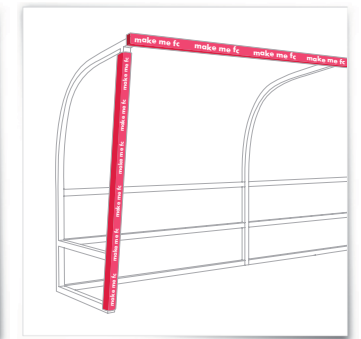

sponsor panel

an additional steel panel secures along the front of the dugout for vinyls and messages.

vinyls

club logos, sponsorship logos or anything you can think of, all applied prior to delivery.

padded vinyls

great for club and sponsor logos and protects the frame edges and players heads from knocks!

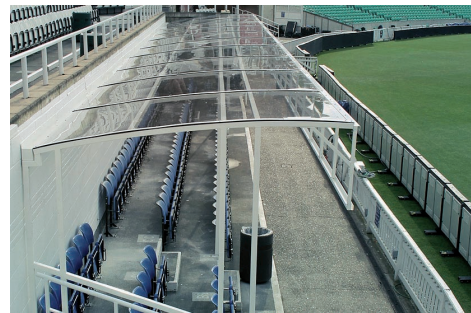

the kia oval

Surrey cricket club players dugout

we were contacted by Surrey Cricket Club to supply a covered shelter for the players as part of the area where Sky Sports run their interviews. the players dugout needed to cover a large area of existing tip-up seats, 160 seats in total.

we initially worked up two designs based off some general dimensions emailed over to us. Following discussions at the club the design was chosen. We arranged a site survey to firm up the measurements and enable us to create an accurate CAD drawing which following signoff we then used to manufacture from.

following a 4 week manufacture period the bespoke dugout was delivered to site and installed by our installation team ready for the arrival of the England cricket team for England v Sri Lanka One Day International, see www.kiaoval.com/1st-fixtures for details.

dunfermline afc

we were contacted by Dunfermline AFC to create a pair of bespoke football dugouts for their pitch side technical area at the East End Park Stadium. the dugouts needed to incorporate two rows of seats, the rear row with tip-up plastic shell seats and the front row with high-end sports seats. we worked on various 3D visuals to give options on colours, size and styling before the final decision was made.

our in house design service enabled us to create various graphic options for the vinyl's and padded vinyls to be to help advertise Dunfermline's sponsor SRJ Windows for maximum impact.

the sports seats to the front row were supplied with two embroidered motifs to the head rest and shoulder part of the seat.

our on-site installation team carried out the assembly of the dugouts, tip-up seats and sports seats giving Dunfermline a fully professional service from start to finish. our guys certainly appreciated the hospitality they received from the staff at the club! we wish Dunfermline the best of luck for the coming season 2014/2015.

crawley town fc

we were contacted by Crawley Town to design and manufacture some new integrated dugouts to fit into their existing allocated space at Broadfield Stadium.

3D visuals enabled us to showcase different angles so Crawley could get a clear understanding of exactly how the proposed new dugouts would look. the final design was a combination of square and curved frames to fit in the available space whilst giving the maximum cover for seated players and staff. we included frost vinyl's to the rear and side panels of the dugout to 'hide' the stepped area behind the technical area.

we utilised our 'BS premium tip-up' seat with screen printed logo for the Home dugout and the equivalent non-padded version for the Away dugout.

astro turf was professionally laid to help keep the area neat and clean, the selection of yarns, colours and tints available meant the clubs new logo could be included and matched perfectly.
